**ENHANCE  
IMMUNITY**

**REDUCE SPASMS  
AND CRAMPING**

**RELEASE  
ENDORPHINS**

What are the benefits of receiving massage or bodywork treatments? Useful for all of the conditions listed below and more, massage can:

- Alleviate **low-back pain** and improve range of motion.
- Ease medication dependence.
- Enhance **immunity** by stimulating lymph flow—the body's natural defense system.
- Exercise and stretch **weak, tight, or atrophied muscles**.
- Help **athletes** of any level prepare for, and recover from, strenuous workouts.
- Improve the condition of the body's largest organ—the skin.
- Increase **joint flexibility**.
- Lessen **depression and anxiety**.
- Promote tissue regeneration, reducing **scar tissue and stretch marks**.
- Pump oxygen and nutrients into tissues and vital organs, improving **circulation**.
- Reduce **post surgery adhesions and swelling**.
- Reduce **spasms and cramping**.
- Relax and soften injured, tired, and **overused muscles**.
- Release endorphins—amino acids that work as the body's natural painkiller.
- **Relieve** migraine pain.

### A Powerful Ally

There's no denying the power of bodywork. Regardless of the adjectives we assign to it (pampering, rejuvenating, therapeutic) or the reasons we seek it out (a luxurious treat, stress relief, pain management), massage therapy can be a powerful ally in your healthcare regimen.

## **RELEASE ENDORPHINS**

### **A Powerful Ally**

There's no denying the power of bodywork. Regardless of the adjectives we assign to it (pampering, rejuvenating, therapeutic) or the reasons we seek it out (a luxurious treat, stress relief, pain management), massage therapy can be a powerful ally in your healthcare regimen.

## **IMPROVE RANGE OF MOTION**

Experts estimate that upwards of ninety percent of disease is stress related. And perhaps nothing ages us faster, internally and externally, than high stress. While eliminating anxiety and pressure altogether in this fast-paced world may be idealistic, massage can, without a doubt, help manage stress. This translates into:

## **REDUCED FATIGUE**

- Decreased anxiety.
- Enhanced sleep quality.
- Greater energy.
- Improved concentration.
- Increased circulation.
- Reduced fatigue.

## **IMPROVED CONCENTRATION**

- Furthermore, clients often report a sense of perspective and clarity after receiving a massage. The emotional balance bodywork provides can often be just as vital and valuable as the more tangible physical benefits.
